Compétences

Méthodologie de projet
Maîtrise

Tailoring of methodologies based on project environment and implementation of best practices. Strong conceptual knowledge of PMI's PMBoK, Prince2, Agile, Lean and IPMA frameworks for project execution and delivery. Ensuring maximum emphasis on avoiding cost overruns and timely delivery.

Jira
Bon niveau

Mapping user stories on the workflow dashboard, planning sprints, feature prioritization and issue tracking. Familiar with both SCRUM and KANBAN methods and application of agile principles.

Business Analysis
Maîtrise

Stakeholder engagement, requirements elicitations and business process design for strategizing product design and development.

Programmation MATLAB/SIMULINK
Bon niveau

Modelling for predictive analytics and decision making. Applied on a production engineering project to model empirical equations for calculating expected forces in the process.

HTML5 / CSS3
Maîtrise

Published self-designed websites on Github. Well familiar with MDN documentation and able to understand, write and edit website source codes.

Python (langage)
Bon niveau

Proficient in data analysis methods for mathematical modelling, applicable to big data. Applied financial analysis methods like Markovitz Portfolio Optimization, Capital Asset Pricing Model and Monte Carlo Simulations. Packages: Numpy, Pandas, Matplotlib, PyPi

Tableau Software
Maîtrise

Data visualisations for analysis and acquiring business intelligence. Applied it to present crucial information on several projects to facilitate strategic decision making. Conducted 4 projects in investment decision making, process optimization, market trends and geographical performance analysis.

Microsoft Excel
Maîtrise

Functions, Macros, PowerQuery and VBA. Managed large quantities of data for tracking metrics and analytical calculation. Well-versed in preparing datasets and testing for quality assurance in data analysis and visualizations.

Microsoft PowerPoint
Maîtrise

Strong public speaking and presentation skills. Have given 30+ crucial presentations and appreciated for having a well-designed and easy to understand presentation.

Langues

Anglais ★★★★ Bilingue

Atouts

1 Strong knowledge of Tableau and Python programming for application in business data analytics. Proficient in designing dashboards and reports to identify gaps in business processes, facilitate designing and implementation of digitally optimized systems.

2 Worked in international companies like Zomato and Airbnb helping build excellent communication and problem-solving skills. These are my strongest assets and have been appreciated by 30+ times by clients, superiors and colleagues for demonstrating autonomy and sincerity in providing solutions.

3 A masters degree in project management with a specialisation in business excellence from Skema business school. One of the most international schools in France. It installed natural appreciation for diversity, inclusivity and collaboration, suited for a dynamic and multicultural working environment.
